

VACANCY FOR LABORATORY TECHNOLOGIST

NIPD Genetics is a leading innovative biotechnology company that designs, develops and provides advanced tests for the prediction, diagnosis and prevention of genetic diseases. NIPD Genetics developed a proprietary technology platform for detection of chromosomal abnormalities, structural rearrangements and point mutations located in any region of the human genome.

The Position

We seek to recruit a **LABORATORY TECHNOLOGIST** to join our dynamic team of experts. The successful candidate will work in the R & D and/or the Production and Diagnostics Department of the company and will have the opportunity to work with cutting edge technology in our modern facilities in Nicosia.

Profile of the ideal candidate

The selected candidate should uphold to the highest standards and be able to contribute to the company's mission to develop and provide the safest and most accurate genetic tests.

Responsibilities

- Responsible to perform clinical laboratory tests and /or assist in the performance of research for all phases of product development for screening and diagnostic services
- Adhering to all departmental protocols and safety procedures and ensure compliance with accreditation requirements
- Responsible to conduct routine maintenance of laboratory equipment, requisition and maintain inventory of laboratory supplies, reagents and other consumables
- Maintaining accurate and detailed records of results and data and respect confidential information concerning patients' personal data

Requirements

- BSc or MSc degree in Biological Science or in a closely related field. Laboratory experience in the field of molecular biology or human genetics will be considered an advantage
- Ability to be proactive, plan and prioritize tasks across multiple projects
- Ability to work well with a team as well as independently
- Enthusiastic attitude and good communication skills
- Fluent in both Greek and English languages
